INSPIRED BY

Jack

GIVE HIM MORE.

The MiniMed™ 670G system is the world’s first insulin delivery system that automatically adapts to your child’s needs.*

NOW APPROVED FOR AGES 7 AND UP.

*Waterproof to a depth of up to 12 feet for up to 24 hours.
MORE TIME IN RANGE

INTRODUCING THE MINIMED™ 670G SYSTEM.

Fluctuating glucose levels make it tough for your child to maintain energy at school, enjoy sports, and get a good night’s sleep. But now, revolutionary pump therapy from Medtronic can help keep your child’s glucose levels in range automatically, day and night.

By automating glucose delivery, the MiniMed™ 670G system helps increase the percentage of time that your child’s glucose levels are between 70–180 mg/dL per unit of time.3 Helps improve time in range, meaning they can spend less time worrying about their glucose levels and more time just being a kid.

LEARN MORE at MedtronicDiabetes.com/children or call Medtronic at 1-888-680-1912.

* By automating glucose delivery, the MiniMed™ 670G system helps increase the percentage of time that your child’s glucose levels are between 70–180 mg/dL per unit of time.3

Helps increase time in range, meaning they can spend less time worrying about their glucose levels and more time just being a kid.

SLEEP

The MiniMed™ 670G system helps you and your child relax and sleep better by letting you know that your child may stay in a healthy glucose range all night long.

“Jack’s quality of sleep is far better—his mind is at ease with the MiniMed™ 670G system watching over him.”

—CAROLE, MOTHER OF JACK

INTRODUCING THE MINIMED™ 670G SYSTEM.

Fluctuating glucose levels make it tough for your child to maintain energy at school, enjoy sports, and get a good night’s sleep. But now, revolutionary pump therapy from Medtronic can help keep your child’s glucose levels in range automatically, day and night.2

By automating glucose delivery, the MiniMed™ 670G system helps increase the percentage of time that your child’s glucose levels are between 70–180 mg/dL per unit of time.3

Helps improve time in range, meaning they can spend less time worrying about their glucose levels and more time just being a kid.
