For in-person training sessions

Always bring your Getting Started Guides to in-person training sessions.

- Getting Started Guide Packet
  - GETTING STARTED WITH YOUR MINIMED™ 670G INSULIN PUMP
  - GETTING STARTED WITH MINIMED™ 670G CONTINUOUS GLUCOSE MONITORING
  - GETTING STARTED WITH YOUR MINIMED™ 670G AUTO MODE

Insulin pump training

Please use the following checklists to make sure you have what you need during your in-person training sessions.

If you are new to pump therapy talk to your healthcare professional to determine if you should modify your insulin injection regiment the day before training.

- MiniMed 670G insulin pump
- CONTOUR®NEXT LINK 2.4 meter kit
- Infusion set serter (if applicable)
- Infusion sets (one box)
- Reservoirs (one box)
- Alcohol wipes
- A vial of rapid-acting insulin U-100

The reservoir for your insulin pump cannot be filled with insulin from an insulin pen. You must have a vial of insulin as prescribed by your healthcare professional.

- Glucose tablets or a snack

Continue to next side.
CGM training

- MiniMed 670G insulin pump
- Guardian™ Link (3) transmitter kit:
  - Fully charged Guardian™ Link (3) transmitter
  - Gray charger (with AAA battery)
  - One-press serter device
- Two Guardian™ Sensors (3)
- Oval tapes in plastic bag from Guardian™ Sensor (3) box
  
  If you bring a box of sensors to the training, be sure not to leave them in a hot car. Heat can damage the sensors.

- Alcohol wipes
- CONTOUR®NEXT LINK 2.4 meter kit
- Glucose tablets or a snack

Auto Mode training

- CGM training items above. Have a working sensor on that is providing glucose information.
- CONTOUR®NEXT LINK 2.4 meter kit
- Glucose tablets or a snack
