MINIMED™ 670G SYSTEM | CHANGING THE MINIMED™ MIO™ ADVANCE INFUSION SET

START HERE

1. Wash your hands. Press \( O \). Select \( \text{Options} \).

2. Select \( \text{Reservoir & Tubing} \).

3. Select \( \text{New Reservoir} \).

4. Remove the infusion set you have been using by loosening the adhesive and pulling away from body.

5. Remove the used reservoir from the pump.

6. Select \( \text{Rewind} \).

FILL RESERVOIR & CONNECT TO THE INFUSION SET TUBING

Follow the next steps to fill reservoir with insulin and connect to the infusion set tubing.

1. Remove from package. Make sure insulin vial is at room temperature to reduce the risk of air bubbles.

2. Pull plunger down to the amount that you plan to fill with insulin.

4. Push and hold plunger down.

Continued on next page
**WARNING** If insulin or any liquid gets inside the tubing connector, it can temporarily block the vents that allow the pump to properly fill the infusion set. This may result in the delivery of too little or too much insulin, which could cause hyperglycemia or hypoglycemia.

You will place the tubing connector onto the end of the infusion set to the filled reservoir.

1. **MINIMED™ MIO ADVANCE™ Infusion Set**
   - Top button
   - Insertion device
   - Cannula housing
   - Disconnect cover
   - Tubing connector
   - Tubing
   - White cap for site connector

2. Gently push the tubing connector onto reservoir. Turn clockwise until locked. You will hear a click.

3. If you see air bubbles, tap reservoir to move them to top. Push plunger just a bit to move them into tubing.

4. Twist plunger counterclockwise to loosen and remove.

**CONNECT RESERVOIR TO INFUSION SET**

Remove infusion set from package. Remove the paper that holds the tubing together and unwind.

**THE BACKLIGHT MAY HAVE TURNED OFF**

Press any button to turn the screen back on.

Press 0 to open the menu. If the pump is locked, you will need to unlock the pump after pressing 0.

Select **Load Reservoir** from the menu.

Select **Next.**

Continued on next page
PLACE RESERVOIR INTO PUMP
Now place the filled reservoir into the reservoir compartment of the pump.

1. Place reservoir into pump.
2. Turn clockwise until you feel reservoir lock into place.
3. Select Next.

LOAD RESERVOIR AND FILL TUBING
Follow these steps to load the reservoir and fill the tubing.

1. Select Load and keep holding 0.
2. When you see this screen, select Next.
3. Select Fill and keep holding 0 until you see drops at the end of tubing, then let go.
4. After you see drops, press > and select Next.

INSERT INFUSION SET
Next, follow the steps to insert the infusion set into your body.

1. Remove the paper backing from the adhesive. Be careful not to touch the adhesive.
2. Remove the disconnect cover from the insertion device by gently squeezing the sides of the disconnect cover then pulling it away from the insertion device. Keep the disconnect cover for later use.

Continued on next page
Choose an insertion site from the shaded areas shown here. Wipe with alcohol or other antiseptic.

Stretch the skin until smooth. Place the insertion device in the desired location on your skin. The raised arrows indicate the direction to connect the tubing. Press the top button completely down to insert the infusion set.

Gently and carefully remove the insertion device by pulling straight away from your body.

Press the adhesive onto the skin with your finger. Replace the infusion set if the adhesive does not stick to the skin.

Gently hold the cannula housing steady with your finger. Then push the site connector straight into the cannula housing until you hear a click.

Dispose of the insertion device in an appropriate sharps container and in accordance with your local laws.

**FILL CANNULA**

You will now fill the cannula, the little tube under your skin, with insulin.

Select **Fill**.

Select **Fill amount** and enter: 0.600 for both the 6mm cannula and 9mm cannula. Then press **O**.

**NOTE:** Your pump will remember the **Fill amount** that you used last. Always verify that the Fill amount is correct.

- If it is correct, press **✓** to **Fill Now** and press **O**.
- If it is incorrect, press **O**. Change to correct amount and press **O**. Select **Fill Now**.
Select Fill Now.

The Home screen displays the insulin as it fills the cannula.

**NOTE:** Select Stop Filling if you need to stop, for example, if you notice the Total amount is incorrect. This should rarely happen if you have verified the Fill amount on the previous screen.

**DISCONNECTING THE INFUSION SET FROM YOUR BODY**

1. To disconnect, gently hold the cannula housing steady with your finger. Then squeeze the sides of the site connector and pull it out from the cannula housing.
2. Put the white cap on the site connector.
3. Put the disconnect cover on the cannula housing. Then push the cover into the cannula housing until you hear a click.

**RECONNECTING THE INFUSION SET TO YOUR BODY**

1. Remove the white cap from the site connector by squeezing the side of the site connector then pulling the white cap off.
2. Ensure there is no air in the tubing. ONLY if there is air in the tubing: Fill the tubing with insulin and watch for drops as instructed. Do not leave any air in the tubing.
3. Use your finger to gently hold the cannula housing steady. Push the site connector into the cannula housing until you hear a click.
