ENTERING YOUR BOLUS WIZARD SETTINGS

Using either your most recent CareLink Personal settings report or your completed Setting Guide with your settings, follow these steps to enter your Bolus Wizard settings into your new pump.

1) From the Home screen, press OPTIONS.
2) Select Options.
3) Select Delivery Settings.
4) Select Bolus Estimate Setup.
5) Select Bolus Wizard to turn on.
6) Press to continue reading text.
7) Select Next.
8) Review the description of Carb Ratio and select Next.
9) Press OPTIONS on the time segment.
10) If you have only one Carb Ratio, press OPTIONS.
    
    If you have more than one Carb Ratio, press or to enter the time that your first Carb Ratio ends and the second begins and press OPTIONS.
11) Press or to enter the g/U of your Carb Ratio and press OPTIONS.
    
    If you have more than one Carb Ratio, continue by entering your time segments and Carb Ratios until all are entered.
12) Select Next.
13) Review the description of Sensitivity Factor and select Next.
14) Press OPTIONS on the time segment.
15) If you have only one Sensitivity Factor, press OPTIONS.
    
    If you have more than one Sensitivity Factor, press or to enter the time that your first Sensitivity Factor ends and the second begins and press OPTIONS.
16) Press or to enter the mg/dL per U of your Sensitivity Factor and press OPTIONS.
    
    If you have more than one Sensitivity Factor, continue by entering your time segments and Sensitivity Factors until all are entered.
17) Select Next.
18) Review the description of BG Target and select Next.
19) Press OPTIONS on the time segment.
20) If you have only one BG Target Range, press OPTIONS.
    
    If you have more than one BG Target Range, press or to enter the time that your first BG Target Range ends and the second begins and press OPTIONS.

NOTE: The boluses shown are for illustration purposes only — your settings and bolus results will be different.
21) Press \(^{\uparrow}\) or \(^{\downarrow}\) to enter the Lo target and press \(\bigcirc\).

22) Press \(^{\uparrow}\) or \(^{\downarrow}\) to enter the Hi target and press \(\bigcirc\).

If you have more than one BG Target Range, continue by entering your time segments and Lo and Hi targets until all are entered.

23) Select Next.

24) Review the description of Active Insulin Time and select Next.

25) Select Duration.

26) Press \(^{\uparrow}\) or \(^{\downarrow}\) to enter the Duration of your Active Insulin Time and press \(\bigcirc\).

27) Select Save.

The Bolus Wizard setup is now complete.

---

**DELIVER FOOD AND CORRECTION BOLUS**

1) Test BG.
2) Press \(\bigcirc\).
3) Select Bolus.
4) Select Bolus Wizard.

If using a linked meter, the BG is on screen. If not, select BG.

5) Press \(^{\uparrow}\) or \(^{\downarrow}\) to enter BG and press \(\bigcirc\).

6) Select Carbs.
7) Press \(^{\uparrow}\) to enter grams of carbs and press \(\bigcirc\).

---

**DELIVER CORRECTION BOLUS - NO FOOD**

1) Test BG.
2) Press \(\bigcirc\).
3) Select Bolus.
4) Select Bolus Wizard.

If using a linked meter, the BG is on screen. If not, select BG.

5) Press \(^{\uparrow}\) or \(^{\downarrow}\) to enter BG and press \(\bigcirc\).

6) Press \(^{\downarrow}\) and select Next.
7) Select Deliver Bolus.

---

**NOTE:** Active Ins. adjust. is the Active Insulin from previous boluses that is adjusted (subtracted) from the correction dose. In this example, there was no active insulin to subtract.

**NOTE:** The boluses shown are for illustration purposes only — your settings and bolus results will be different.
**DETERMINE FOOD BOLUS - NO CORRECTION**

1) Press **O**.

2) Select **Bolus**.

3) Select **Bolus Wizard**.

4) Press **v** and select **Carbs**.

5) Press **^** to enter the amount of carbs you are eating and press **O**.

6) Select **Next**.

7) Select **Deliver Bolus**.

**NOTE:** Active Insulin is never adjusted (subtracted) from a food bolus.

**CHECKING BOLUS HISTORY**

1) Press **O**.

2) Select **Options**.

3) Select **History**.

4) Select **Daily History**.

5) Press **O** on the day you would like to review.

**NOTE:** You can press the **<** and **>** arrows to move from day to day. You can also see further details by pressing **O** on any item listed.

**EDIT BOLUS WIZARD SETTINGS**

After completing the initial Bolus Wizard setup, the individual settings will be accessible as menu items. If you need to make a change to any of these settings, you can press down to the setting, select it, and make the necessary changes.

1) Press **O**.

2) Select **Options**.

3) Select **Delivery Settings**.

4) Select **Bolus Estimate Setup**.

5) Select the setting to be changed.

6) Select **Edit**.

7) Press **O** on the time segment. Press **^** or **v** to change the times and/or values.

8) Select **Save**.

**REVIEW BOLUS WIZARD SETTINGS**

1) Press **O**.

2) Select **Status**.

3) Select **Settings Review**.

4) Press **v** to scroll through the list of settings.

**NOTE:** The boluses shown are for illustration purposes only — your settings and bolus results will be different.
